1. Objective

The objective of this technical manual is to provide a comprehensive and detailed guide to the "Passale - Exhibitors" application. This tool is specifically designed to be used in exhibitor booths at conventions. The application allows exhibitors to scan the QR codes on visitors’ badges, thus obtaining contact information in real time. This manual aims to help users understand, install, configure, and operate the application effectively and efficiently, ensuring optimal use of all its functionalities to enhance the event experience and maximize networking and follow-up opportunities.

2. Scope

This technical manual covers all necessary aspects for the installation, configuration, and operation of the "Passale - Exhibitors" application.

3. General Description

"Passale - Exhibitors" is an app designed to facilitate contact management at exhibitor booths during conventions and events. Its main functionality is reading QR codes present on visitor badges, allowing exhibitors to obtain real-time contact information quickly and efficiently.

The application not only enables scanning and data retrieval but also provides additional tools to optimize the exhibitor experience. Among those key features are:

- Note Addition: Exhibitors can add personalized notes to each scanned contact, which helps remember important details or carry out personalized follow-ups.
- Data Export: The application allows exporting the scans to an Excel file, which is downloaded from the registration page https://burquesa.com.mx/register , making it easier to manage and analyze the collected data after the event.

"Passale - Exhibitors" is designed to be an essential tool for exhibitors, providing a comprehensive solution for capturing, managing, and using visitors’ contact information, thereby improving efficiency and effectiveness at events and conventions.
